Allen County Sheriff Sam Crish has called BCI to investigate the possible theft of items from the evidence room at the Allen County Sheriff's Office. Crish called BCI on Friday after items were discovered missing. BCI will conduct an investigation separate from the Sheriff's Office.

Crish said a combination lock is on the door leading to the room and only three people know the code. Crish said there were no signs of forced entry, meaning access to the room was granted by using the combination. He declined to name the three individuals who know the code, as well as the missing items due to the ongoing investigation.
